<p>1. Length 1 meter, weight 28g</p> <p>2. All three connectors support charging and data transmission simultaneously. Maximum current up to 2.4A</p> <p>3. The cable body will present a three-color streamer effect during charging. The light source is emitted by the USB end and transmitted by optical fiber wire, which has low power consumption and more energy saving.</p> <p>4. Note: The streamer effect is directly related to the charging current. The large current - effect faster, the small current - effect is slower.</p>	silver	79800		Streamer charging data cable for Micro	D25V
